

THE ultimate

in vehicle protection

Paint Protection High Gloss Paint Protection

Protection from our harsh environment

- Motor One's secret formula paint protection is applied once, penetrating and sealing the coated area.
- Stops paint from fading and oxidizing.
- Protects against the sun's damaging UV rays.
- Locks in the shine, maintaining that new car look.
- Protection from road grime, rain & atmospheric pollutants.
- No need for waxing and polishing.
- Retains greater vehicle resale value
- We Guarantee it!

Interior Protection Invisible Protective Barrier

Fabric & Carpet Protection

Seals and strengthens fibres.

- Repelling liquids, dirt, food, perspiration, grease and grime.
- Compatible with synthetic and natural fibres.

The sealed fabric

- Remains soft and supple.
- Keeps the same feel and texture.
- Increases resistance to abrasion

Vinyl & Leather Protection

Penetrates and permanently seals the surface

- Seals the porous surface, preventing cracking.
- Protection from harmful UV rays.
- Keeps the surface soft, supple and stain free.
- Maintains the true colour of your vehicles interior.

Both interior treatments are

- Low maintenance - no re-application is required.
- Non-toxic and odourless, once cured.
- Liquid stains and spills will simply blot-up.
- We Guarantee it!

Enviroshield Paint Finish Twenty-First Century Technology

Unlike conventional paint sealants and polishes, Enviroshield's patented biodegradable components

(not soluble in water) provide the ultimate high gloss protective coating without forming an airtight barrier over the paint.

- Enviroshield repels all the dirt and grime while still allowing the paintwork to breathe.
- Stops paint from fading and oxidizing.
- Protects against the sun's damaging UV rays.
- Locks in the shine, maintaining that new car look.
- Protects against acid rain, alkali pollution, bird droppings, tree sap, hardwater deposits and road grime.
- Protection from atmospheric pollutants.
- No need for waxing and polishing.
- No ugly buffing and scratching marks.
- Retains greater vehicle resale value.
- We Guarantee It!

Titanium Window Tint The Ultimate Protection Under the Sun for Safer, Cooler Driving.

Dynamic metallisation process replaces dyes,

eliminating colour change, bubbling and optical clarity loss.

- Reduces glare, by more than 60% Significantly reducing eye strain.
- Rejects almost 100% of Ultra Violet rays.
- Reflects up to 60% of solar energy (heat) reducing cabin temperature which increases air conditioner efficiency.
- Increases safety in accidents. Glass fragments are held by the film, reducing the chance of eye injury and laceration.
- Gives vehicles an improved, sleeker look.
- Offers more privacy to the occupants and greater security for items left in the vehicle.
- Can improve resale value.
- We guarantee it!

THE ultimate

in vehicle protection

RustStopper Protection Prevention Peace of mind

Electronic Corrosion Control

- 100% environmentally friendly.
- RustStopper is a third generation advanced technology electronic corrosion inhibitor. The module employs state of the art embedded computer controls to generate high speed pulsed current action to reduce iron loss or corrosion.
- Absolutely no toxic chemicals are used which can be harmful to delicate water tables, as well as the health of your employees.
- RustStopper, when tested in Laboratory conditions, was shown to reduce the corrosion process by as much as 80%, effectively doubling your vehicle's life span against rust and corrosion.
- The Ruststopper system can be transferred to another vehicle upon sale of your car. Refer to dealer for details.
- A unique voltage regulating circuit shuts off the unit if the vehicle battery voltage drops below 11.9 volts, thus preventing battery drainage via 'parasitic draw'. The unit only draws 15 milliamps (about the same as a digital dashboard clock).
- The RustStopper system carries a Limited Lifetime Warranty against corrosion.
- We Guarantee it!!

Rust & Underbody Protection

- Wax-based atomised process sprayed under pressure penetrating into body sections, seams and cavities providing a protective barrier sealing out air, moisture, salt and dust
- Requires no drilling or trim removal
- Once only application
- Neutralises any existing rust preventing its' spread
- Proven product which is clean and odourless
- Eliminates costly rust repairs

The benefits of Underbody Protection:

- Insulates against extreme temperature conditions
- Self healing against stone impacts and scratches
- Completes total rustproofing process
- Reduces road noise
- Seals out moisture, water and dust
- Conforms to Australian Standards: When Underbody Protection is combined with Rust Protection the application complies with the rust proofing Australian Standards AS2662 Part 2. Rust and Underbody products conform to Australian Standard AS2662 Part 1
- Annual inspections on rust treatments required to maintain the validity of the warranty. Fees apply. Please refer to warranty conditions.

Rust Proofing Protection The Ultimate in Rust Proofing

Upper Body Protection

A unique wax based rust proofing solution developed by Ming.

Protects and seals internal surfaces.

Penetrates and seals joints and seams in:

- Tail Lights and Mountings
- Head Lights and Mountings
- Doors
- Boot Internals
- Inner Guards
- Under Bonnet
- Engine Bay
- Sills

Under Body Protection

Provides a protective shield, seals out air, water salt and road grime.

- Thixotropic compounds completely seal metal components.
- Self healing - scratches and scrapes do not inhibit its ability to prevent rust.
- Conforms to Australian Standards for anti-corrosion products (AS2662-1 & AS2662-2).
- Assists in neutralising any existing rust, helping to reduce its spread.
- We Guarantee it!
